

# About whiteboard

---

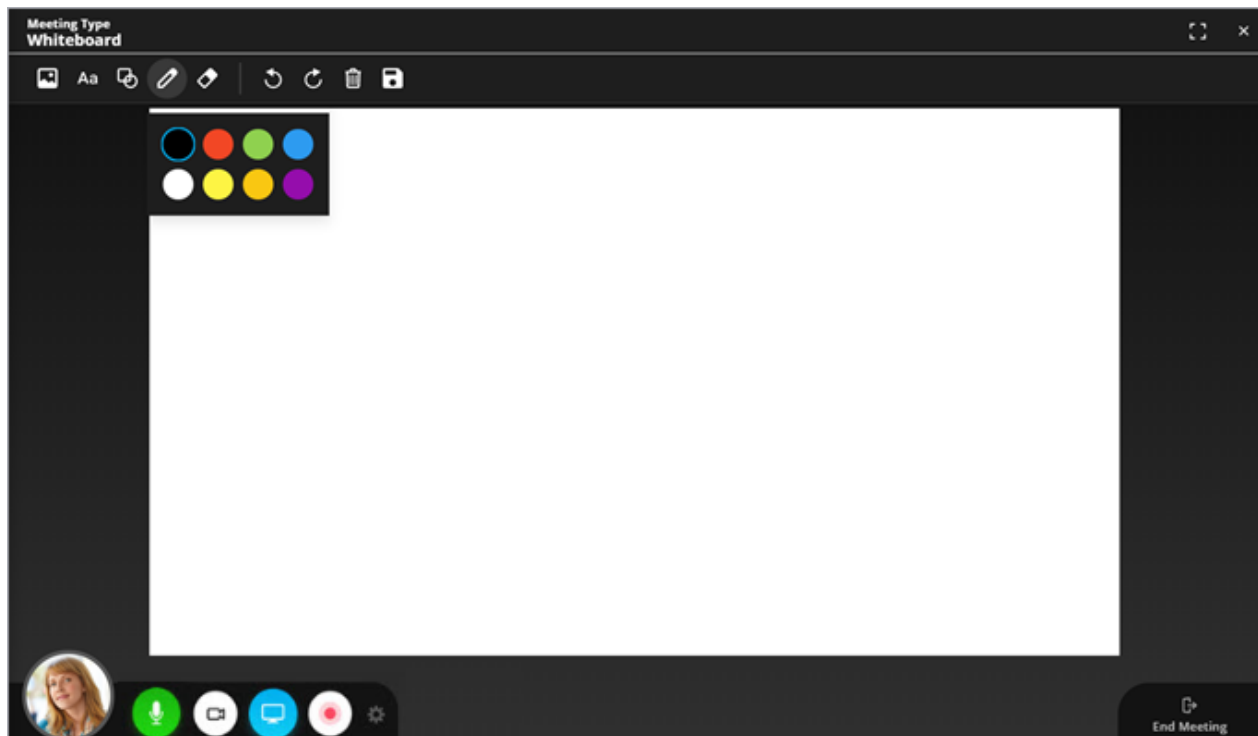

Use the interactive whiteboard to illustrate your ideas and collaborate with your guests in real time.

Anyone can open a whiteboard without being promoted. If you'd like, you can [restrict sharing](#) in your meeting room to only yourself and presenters (guests that you [promote](#)).

**Note:** You cannot open a whiteboard or make edits from the mobile apps. Mobile users can view edits to the whiteboard in real time.

## Collaborate with the whiteboard

To get started, click the **Share** button and then select **Whiteboard**. Use the tools on the whiteboard controls to add a background image to the whiteboard, add text, draw shapes, and draw with the pen.

You can resize and move elements after adding them to the whiteboard. You cannot resize or move background images.

You can also erase an element, undo or redo your own edits, or clear the whiteboard. When you're ready, download a copy of the whiteboard as an image to save and share.

**Note:** Hosts and promoted guests can delete or move any element on the whiteboard, or clear the whiteboard. Other guests can only delete or move their own edits.

Ending the meeting will clear the whiteboard and all edits will be lost. Whiteboard edits will not be lost when switching from whiteboard sharing to screen or file sharing.
